

microMAGS

2D Builds

Get ready for BIG fun with small tiles and these FREE MAGNA-TILES® 2D build templates. These printable sheets are the perfect way to introduce your child to the exciting world of microMAGS play. Take creativity, learning, development, and imagination anywhere – with the power of portable pieces that are 75% smaller than our traditional tiles.

We recommend using our [microMAGS 70-Piece Set](#) to complete these 2D builds. This versatile set provides a wide range of colors and shapes to bring your child's creations to life.

We're thrilled to have partnered with Bright Little Brains to create this free resource. Building with microMAGS helps children develop:

- Fine motor skills: Strengthening small muscles in hands and fingers.
- Problem-solving skills: Figuring out how to assemble the pieces.
- Spatial awareness: Understanding shapes and how they fit together.
- Creativity: Imagining and building unique designs.

To get started:

1. Print the 2D build templates using standard size 8.5" x 11" paper.
2. Gather your microMAGS set.
3. Follow the template to create your masterpiece!

Share your creations: We love to see what you create! Tag us on social media with #MAGNATILES.

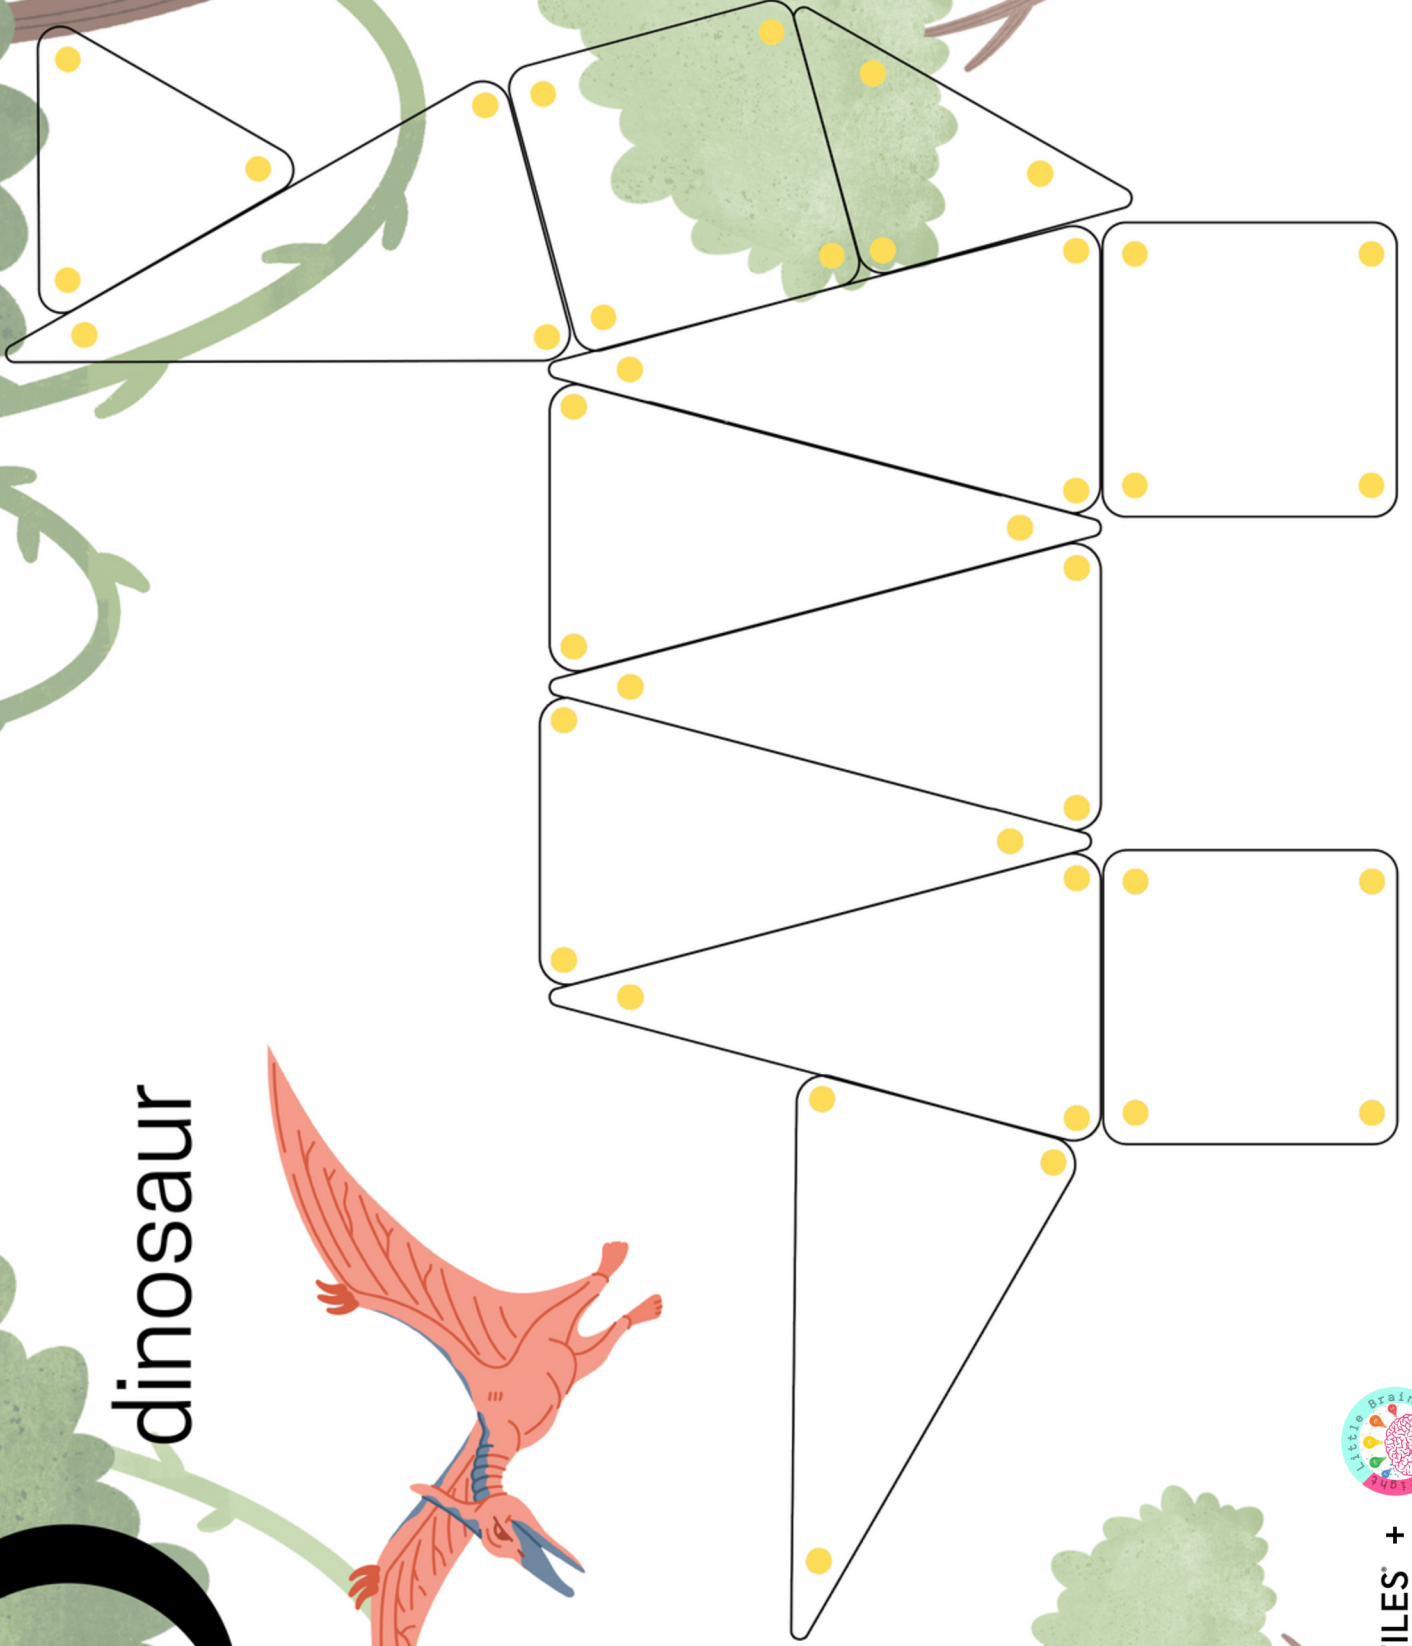

**Enjoy hours of imaginative play and learning
with our free 2D build templates!**

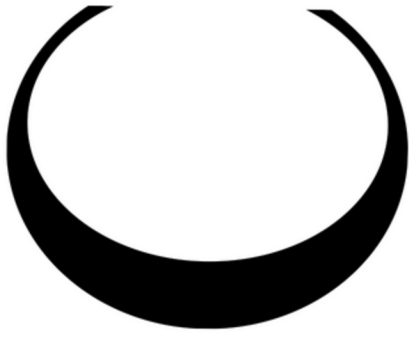

Please note that this printable is for personal use only.
You're welcome to use it in your home or classroom.
